CCAPDEV MP Specifications
Group 2 - S11

CAR DEALERSHIP
Selling different kinds of cars. (SUV, Sports, Sedan, etc.)

FEATURES

Explore All Vehicles
A user may choose to view all available cars for sale or search by categories or search for a specific car by entering its model.

Search Cars
A user may search the range of cars based on the given parameters such as categories, price, etc.

Sorting Cars
A user may be given the feature to sort all cars by either price, model or by alphabetical order (name).

Model Specs
Details about the specs of a specific car can be viewed such as: highlights, exterior, interior, safety and security, performance, and technology.

Customizable Exterior
Preview of what the car would look like based on all the color options available. This feature is only available if the user has an account.

Registration
All customers are required to register an account on the website before incurring any sale of a vehicle. The customer registers his or her full name, username, password, email, age, credit card details and proof of a driver's license to make an account.

For administrator users, they are required to place their ID number.
Note: Customers must be at least 18 years old, with a valid credit card and a valid driver's license.

Login
After registering properly with valid information, the user may log-in. Upon logging in, they now have access to go through the process of purchasing a car. Also, users can choose their exterior color before confirming their purchase.

Logout
After viewing the website with the account, the user (both customer and admin) can log out.

Add Vehicle
This feature is only available to the administrator of the website. The admin can add the car description and the pictures/media of the car.

Edit Vehicle
This feature is only available to the administrator. The admin can edit the car description or modify the media of the intended car.

Remove Vehicle
This feature is only available to the administrator. The admin can remove the feature of the car for whatever intended reason.

General
Good user experience is expected. Users may not require any assistance in navigating the website. The design of the website should please the sight of the user.
